

## Where can the Revanesse® products be used?

Whether you're looking to recapture youth, restore volume or sculpt a 'new you', the Revanesse® family of products have the ideal fillers tailored for you.

Revanesse®  
Family of Dermal Fillers

For lasting and carefree beauty, ask for Revanesse® by name. Consult your physician for a treatment plan tailored to your face.

*Revanesse® is only available through a licensed physician.*

## Bio-Revitalization Therapy

### Revanesse® Pure

Our skin plays a vital role in our health and well-being, and HA is an essential part of that. This naturally occurring substance binds water, thereby hydrating the skin, keeping it firm and healthy.

Revanesse® Pure helps to nourish and moisturize the entire surface of the face, creating healthier looking skin. Revanesse® Pure can also be used on the hands, neck, and chest area.

Revitalize. Rejuvenate. ReNew®

**What is Revanesse®?**

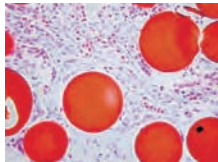

Revanesse® is an injectable dermal filler made up of hyaluronic acid (HA), a naturally occurring sugar found in the skin. It is used to smooth out lines and wrinkles, add volume to the lips and rejuvenate the skin, allowing you to recapture a more youthful look.

**Safe & Effective**

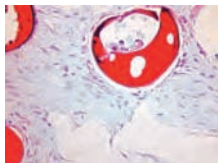

The HA used in the Revanesse® family of products is obtained through non-animal sources, making it safe for medical use. It is then put through a sophisticated proprietary bonding process called Thixofix® cross-linking to make it more durable so that it lasts in your skin. This technology also greatly reduces undesirable side effects. Revanesse® uses an ideal concentration of HA for maximum durability, and its ultra smooth texture ensures natural looking results that last.

**Producing New Collagen**

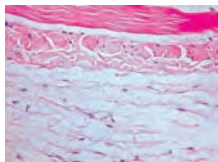

The key ingredient in ReDexis® - Dextranomer beads – is made of biocompatible sugar molecules that stimulate new collagen production. This new collagen will stay at the injection site, providing natural augmentation long after the HA has been absorbed. The end result is increased volume to the injection site and a longer lasting, more natural look.

**6 Months**  
Dextranomer beads are 100% present.

**12 Months**  
Dextranomer Beads are 40% present. Collagen synthesis has started.

**24 Months**  
No Beads are detectable. Note the formation of new collagen.

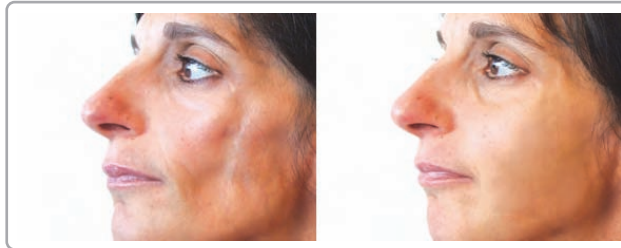

• Facial asymmetry - right cheek treated with eight syringes of Revanesse® Ultra

• Perioral lines and surrounding area treated with two syringes of Revanesse® Pure

• Nasolabial folds and marionette lines treated with two syringes of Revanesse® Ultra

• Facial asymmetry corrected with several syringes of Revanesse® Ultra

**Is Revanesse® right for me?**

Revanesse® is an injectable dermal filler, made from Hyaluronic Acid. The Revanesse® Family of Products are ideal for anyone who is looking to fill in lines and wrinkles, improve or create more volume and definition in the lips, rehydrate the skin, contour the face or simply recapture a more youthful look.

**What do I need to know before and after my treatment?**

Do not take any blood thinners (Aspirin, Advil, etc), for at least 3 days prior to your treatment as they may increase bleeding at the injection site.

It is not advisable to be exposed to extreme heat (e.g. sauna, tanning) for at least 2 weeks after the treatment as it may reduce the longevity of your treatment. You can begin to re-apply make-up immediately after your treatment.

**What are the possible side effects?**

The most common side effects are slight swelling, redness, or bruising, which are easily covered with light make-up. Your physician will go over all of the possible side effects prior to treatment.

**What makes the Revanesse® Family different?**

The Revanesse® Family of products uses our proprietary Thixofix® technology to create a high quality, safe, long lasting dermal filler.

**How long do the Revanesse® products last?**

The Revanesse® family of products offer a wide variety of options that will last anywhere from 6 months to 2 years depending on what you are looking for.

**What is the difference between Revanesse® and Revanesse® Pure?**

Revanesse® is used deeper in the skin to smooth lines and wrinkles, add volume to the lips, and sculpt the face. Revanesse® Pure is used in the uppermost layer to rehydrate the skin and keep it looking firm and healthy.
